Information in relation to Section 871(m) of the Internal Revenue Code

The U.S. Treasury Department has issued regulations under which amounts paid or deemed paid on certain financial instruments that are treated as attributable to U.S.-source dividends could be treated, in whole or in part depending on the circumstances, as a "dividend equivalent" payment that is subject to tax at a rate of 30 per cent. (or a lower rate under an applicable treaty). The Issuer has determined that, as of the issue date of the Securities, the Securities will not be subject to withholding under these rules. In certain limited circumstances, however, it is possible for United States alien holders to be liable for tax under these rules with respect to a combination of transactions treated as having been entered into in connection with each other even when no withholding is required. United States alien holders should consult their tax advisor concerning these regulations, subsequent official guidance and regarding any other possible alternative characterisations of their Securities for United States federal income tax purposes. See "United States Tax Considerations – Dividend Equivalent Payments" in the Base Prospectus for a more comprehensive discussion of the application of Section 871(m) to the Securities.

What are the key risks that are specific to the Issuer?

The Issuer is subject to the following key risks:

- Investors are exposed to the risk relating to the creditworthiness of GSBE. An insolvency of GSBE may occur despite of the fact that GSBE is a direct subsidiary of Goldman Sachs Bank USA and indirect subsidiary of GSG. A potential failure of Goldman Sachs Bank USA, GSG or a company affiliated with GSG and measures taken in accordance with the U.S. Resolution Regimes may also affect GSBE. As a consequence, in case the hedging arrangements prove to be insufficient to satisfy the claims of all holders investors may lose parts of their investment or their entire investment (**risk of total loss**).
- GSG together with its consolidated subsidiaries is a leading global investment banking, securities and investment management group and faces a variety of significant risks which may affect the Issuer's ability to fulfil its obligations under the Securities, including market risks, liquidity risks, credit risks, operational risks, legal and regulatory risks, competition risks and market development and general business environment risks.
- GSBE is subject to a variety of risks arising from its business activities including (i) liquidity risks, in particular in connection with the loss of deposits and the inability to obtain or maintain sufficient funding from GSG or any of its subsidiaries, (ii) market risks, in particular in connection with conditions in the global financial markets and broader economic conditions, declining asset values, market volatility affecting market-making activities, (iii) credit risks, in particular in connection with the deterioration in the credit quality of or defaults by third parties, (iv) operational risks, in particular in connection with a failure in GSBE's operational systems or infrastructure and GSBE's reliance on affiliate companies, (v) legal and regulatory risks, in particular in connection with extensive and pervasive regulation and enforcement actions by competent authorities, (vi) competition risks, in particular in connection with the composition of the client base and the highly competitive financial service industry and (vii) market developments and general business environment risks, in particular in connection with unforeseen or catastrophic events, negative publicity, changes in rates or other underliers.

- GSBE is subject to risks related to resolution and recovery planning in Europe and Germany. The circumstances in which a resolution authority would exercise its "bail-in" powers to recapitalise a failing entity by writing down its unsecured debt or converting it into equity are uncertain. If these powers were to be exercised (or if there was a suggestion that they could be exercised) in respect of GSBE, such exercise would likely have a material adverse effect on the value of debt investments issued by GSBE, including a potential loss of some or all of such investments.

Section 3 – Key information on the Securities

The form and content of the Securities and all rights and obligations of the Issuer and of the Security Holders will be governed by, and construed in all respects in accordance with the laws of Germany.

The Securities give the right to each holder of Securities to receive a potential return on the Securities.

Effect of underlying instrument(s) on value of investment

There is a relationship between the economic value of the Securities and the economic value of the Underlying. The value of the Security will typically fall if the price of the Underlying falls.

Security Holders of Turbo Bull Warrants expect the market price of the Underlying to rise.

Turbo Warrants have a fixed term. Subject to the occurrence of a Knock-Out Event, the Turbo Warrant will automatically be exercised on the Final Valuation Date (European Exercise Style). The Security Holders do not have the right to exercise the Turbo Warrants during the term.

Provided that no Knock-Out Event has occurred, the Security Holders will receive a Settlement Amount on the Settlement Date. The Settlement Amount is equal to the amount by which the Reference Price exceeds the Strike. The result will be multiplied by the Multiplier and, if applicable, converted into the Settlement Currency.

A Knock-Out Event occurs if the Underlying is equal to or below the Knock-Out Barrier. The Knock-Out Barrier is equal to the Strike. In the case of a Knock-Out Event, the Turbo Warrant will immediately expire worthless without the need for separate termination.

Subject to potential selling restrictions, the Securities will be freely transferable.

What are the key risks that are specific to the Securities?

The specific risk factors related to the Securities are described below:

- In the case of Turbo Warrants there is a risk that the Security Holder suffers significant losses. Furthermore, in the case of Turbo Warrants, there is the risk that the products expire worthless during their term, if a Knock-Out Event has occurred.
- The Security Holder bears the risk of strong price fluctuations of Turbo Warrants whereby in particular the leverage effect is a risk-increasing feature which has to be taken into account for Turbo Warrants.
- An adverse development of the macroeconomic factors may have an adverse impact on the price development of the share price and accordingly adversely affect the value of the Securities and/or the Settlement Amount and/or any other payments or deliveries under the Securities. Security Holders will usually not participate in dividends or other distributions paid on a Share.
- Security Holders bear the risk of fluctuations in the value of the Underlying, which may have an adverse effect on the value of the Securities and the yield expected by the Security Holder.
- Security Holders should note that there is a risk that certain events in connection with the Securities may cause the Issuer and/or the Calculation Agent to make decisions or determinations in its reasonable discretion with respect to the Securities which may have a negative effect on the value and yield of the Securities.
- The Conditions of the Securities may provide for extraordinary termination by the Issuer in certain cases so that the Security Holder bears a risk of loss as the termination amount equals the market price of the Securities which can be even zero. The Security Holder also bears the reinvestment risk in relation to the termination amount.
- Security Holders bear the risk that the Securities cannot be sold at a specific time or at a specific price during their term.
- Security Holders bear the risk of loss due to the tax treatment of the Securities. In addition, the tax assessment of the Securities may change. This may have a significant adverse effect on the price and redemption of the Securities and the payment under the Securities.

Section 4 – Key information on the offer of the Securities to the public and/or the admission to trading on a regulated market

Under which conditions and timetable can the Investor invest in this Security?

General terms, conditions and expected timetable of the offer

Start of offer in France and Luxembourg:

May 5, 2025

Issue Price: EUR 0.58

Issue Date: At the earliest May 7, 2025, in any case the Issue Date is on or before the first settlement date of a transaction in the Securities.

Estimate of the total expenses charged to the investor

The product-specific entry costs included in the Issue Price are EUR 0.1287. These costs are calculated based on the Issue Price above; for any costs at the time of the purchase of the Securities the cost disclosure under Directive 2014/65/EU and Commission Delegated Regulation (EU) 2017/565 (MiFID II Cost Disclosure) is relevant. The calculation of costs may change over the term of the Securities. The MiFID II Cost Disclosure includes also non-product specific costs which may be charged by a third party to the investor which have to be separately disclosed by the third party.

Why is this Prospectus being produced?

Use and estimated net amount of the proceeds

The proceeds from the Securities are used to hedge the payment obligations arising from the issuance of the Securities and for purposes of the Issuer's ordinary business activities (in any case the Issuer is free in the use of the proceeds of an issue of Securities).

Underwriting agreement

The offer of the Securities is not subject to an underwriting agreement.

Indication of the most material conflicts of interest pertaining to the offer or the admission to trading

The selling price of the Securities may contain commissions charged by the market maker for the issue or which may be passed on by the market maker to distribution partners in whole or in part as consideration for distribution activities. Commissions that may be contained therein have a negative effect on the ability of the holder of the Securities to generate earnings. It must furthermore be considered that the payment of these commissions to distribution partners may lead to conflicts of interest for the detriment of the holder of the Security since this could provide an incentive for the distribution partner to prefer selling products with higher commissions to its clients. The Issuer and its affiliated companies may also engage in activities that may give rise to potential conflicts of interest and may affect the value of the Securities, e.g. in connection with market-making or the exercise of various functions in connection with the issue of the Securities (for example, as calculation agent).

QUELS SONT LES PRINCIPAUX RISQUES SPÉCIFIQUES À L'EMETTEUR?

L'Emetteur est soumis aux principaux risques suivants:

- Les investisseurs sont exposés au risque relatif à la solvabilité de GSBE. Une insolvabilité de GSBE peut survenir malgré le fait que GSBE est une filiale directe de Goldman Sachs Bank USA et une filiale indirecte de GSG. Une défaillance potentielle de Goldman Sachs Bank USA, GSG ou d'une société liée à GSG et des mesures adoptées conformément aux *U.S. Resolution Regimes* peuvent aussi affecter GSBE. Par conséquent, dans le cas où les opérations de couverture s'avèrent insuffisantes pour satisfaire les demandes de tous les détenteurs, les investisseurs peuvent perdre une partie de leur investissement ou leur investissement entier (**risque de perte totale**).
- GSG ensemble avec ses filiales consolidées est un groupe mondial de premier plan dans le domaine des activités bancaires d'investissement, des valeurs mobilières et de la gestion des investissements et est confronté à une variété de risques importants qui peuvent affecter la capacité de l'Emetteur à remplir ses obligations en vertu des Titres, y compris les risques de marché, les risques de liquidité, les risques de crédit, les risques opérationnels, les risques juridiques et réglementaires, les risques de concurrence et les risques liés à l'évolution du marché et à l'environnement commercial général.
- GSBE est soumise à divers risques découlant de ses activités commerciales, y compris (i) les risques de liquidité, en particulier liés à la perte des dépôts et à l'impossibilité d'obtenir ou de maintenir un financement suffisant de la part de GSG ou d'une de ses filiales (ii) les risques de marché, en particulier en relation avec les conditions des marchés financiers mondiaux et les conditions économiques plus larges, la baisse de la valeur des actifs, la volatilité du marché affectant les activités de tenue de marché, (iii) les risques de crédit, en particulier liés à la détérioration de la qualité du crédit ou aux défaillances de tiers, (iv) les risques opérationnels, découlant en particulier d'une défaillance de les systèmes opérationnels ou l'infrastructure de GSBE et la dépendance de GSBE à l'égard des sociétés affiliées, (v) les risques juridiques et réglementaires, découlant en particulier des réglementations étendues et des mesures d'exécution prises par les autorités compétentes et (vi) les risques de concurrence, en particulier en ce qui concerne la composition de la clientèle et le secteur hautement concurrentiel des services financiers, (vii) les risques liés à l'évolution du marché et à l'environnement

commercial général, en particulier en relation avec des événements imprévus ou catastrophiques, la publicité négative, les changements de taux ou d'autres facteurs sous-jacents.

- GSBE est soumise aux risques liés aux plans de résolution et de redressement en Europe et en Allemagne. Les circonstances dans lesquelles une autorité de résolution exercerait ses pouvoirs de "bail-in" pour recapitaliser une entité défaillante en dépréciant sa dette non garantie ou en la convertissant en capitaux propres sont incertaines. Si ces pouvoirs devaient être exercés (ou s'il y avait une indication qu'ils puissent être exercés) à l'égard de GSBE, cet exercice aurait probablement un effet négatif important sur la valeur des investissements en dette émis par GSBE, y compris une perte potentielle de tout ou partie de ces investissements.

A condition qu'aucun Événement Knock-Out ne se soit produit, les Détenteurs de Titres recevront un Montant de Règlement à la Date de Règlement. Le résultat sera multiplié par le Multiplicateur et, le cas échéant, converti dans la Devise de Règlement.

Un Événement Knock-Out survient si le Sous-Jacent est égal ou inférieur à la Barrière Knock-Out. La Barrière Knock-Out est égale au Prix d'Exercice. En cas d'Événement Knock-Out, les Turbo Warrants expireront immédiatement sans valeur sans nécessité de terminaison séparée.

Quels sont les principaux risques propres aux Titres ?

Les facteurs de risques propres aux Titres sont décrits ci-dessous:

- Dans le cas des Turbo Warrants il existe un risque que le Détenteur du Titre subisse des pertes conséquentes. En outre, dans le cas des Turbo Warrants, il existe un risque que le produit expire sans valeur pendant leur durée, si un Evénement Knock-Out s'est produit.
- Le Détenteur du Titre supporte le risque d'importantes fluctuations de prix des Turbo Warrants des pour lesquelles l'effet de levier en particulier est un facteur de risque aggravant qui doit être pris en compte pour les Turbo Warrants.
- Un développement négatif des facteurs macroéconomiques peut avoir un impact négatif sur le développement du prix de l'action et par conséquent peut affecter négativement la valeur des Titres et/ou du Montant de Règlement et/ou tous autres paiements ou autres distributions en vertu des Titres. Les Détenteurs de Titres ne participent généralement pas aux dividendes et aux autres distributions payées sur une Action.
- Les Détenteurs du Titre supportent le risque de fluctuations de la valeur du Sous-Jacent, ce qui peut affecter défavorablement la valeur des Titres et le rendement attendu par le Détenteur de Titre.
- Les Détenteurs du Titre doivent noter qu'il existe un risque que certains événements en relation avec les Titres puissent aboutir à ce que l'Emetteur et/ou l'Agent de Calcul prennent des décisions à leur discrétion raisonnable concernant les Titres ce qui peut avoir un effet défavorable sur la valeur et le rendement des Titres.
- Les Conditions des Titres peuvent prévoir une résiliation extraordinaire par l'Emetteur dans certains cas, de sorte que, le Détenteur du Titre supporte un risque de perte puisque le montant de résiliation équivaut au prix du marché des Titres qui peut être égal à zéro. Le Détenteur du Titre supporte également le risque de réinvestissement en relation avec le montant de résiliation.
- Les Détenteurs du Titre supportent le risque que les Titres ne puissent pas être vendus à un moment précis ou à un prix spécifique pendant leur durée.
- Les Détenteurs du Titre supportent le risque de perte due au traitement fiscal des Titres. De plus, le régime fiscal des Titres peut varier. Cela peut avoir un effet défavorable sur le prix et le rachat des Titres et sur le paiement en vertu des Titres.

Description des conflits d'intérêts matériels les plus importants concernant l'offre ou l'admission à la négociation

Le prix de vente des Titres peut comprendre des commissions facturées par le marché pour l'émission ou qui peuvent être transférées par le teneur de marché aux partenaires de distribution en tout ou partie en tant que rémunération pour les activités de distribution. Des commissions comprises dans ce prix peuvent avoir un effet négatif sur la possibilité de générer des profits pour le détenteur de Titres. Il doit dès lors être considéré que le paiement de ces commissions aux partenaires de distribution peut conduire à des conflits d'intérêts au détriment du détenteur du Titre puisque ceci peut fournir un incitant au partenaire de distribution de préférer vendre des produits avec des commissions importantes à ses clients. L'Emetteur et ses sociétés liées peuvent également s'engager dans des activités qui peuvent engendrer des conflits d'intérêts potentiels et peuvent affecter la

valeur des Titres, par exemple en relation avec la tenue du marché ou l'exercice de diverses fonctions en relation avec l'émission des Titres (par exemple, en tant qu'agent de calcul).
